PROJ: WGS84

COUNTRY MAP:

SCALE: 1:60,000,000
PROJ: NA LAMBERT CONFORMAL

NOTABLE PEAKS LISTED IN ORDER OF ALTITUDE.

MAJOR CITIES DETERMINED BY POPULATION.

Rocky Mountain State Facts:

AREA: 269,837 KM²
POPULATION: 5,607,154
CAPITAL: DENVER

GEOLOGY AND CLIMATE:

Colorado is home to many geologically diverse regions, with the continental divide and the the front range of the rocky mountains running through the state's center, the more arid regions to the south of the front range and the plains-covered regions to the east. Within these different regions of the state, the climates vary drastically, from the cold alpine of the rockies, to the heat of the plains and the desert to the south.

Notable Peaks:

- ▲ Mount Elbert 4402m
- ▲ Mount Massive 4398m
- ▲ Mount Harvard 4395m
- ▲ Blanca Peak 4374m
- ▲ La Plata Peak 4372m
- ▲ Uncompahgre Peak 4365m
- ▲ Longs Peak 4346m
